

Soapbox Specifications

Construction

The soapbox must:

- Be no longer than 2 metres and no wider than 1 metre
- Have a minimum ground clearance of 6" (15cm)
- Have four wheels
- Be capable of being steered
- Utilise some form of inbuilt mechanism to provide braking power
- Have no propulsion unit or system of any kind
- Be strong enough to make at least 3 runs of the 100 metre course in competition
- Be capable of running on a grass surface
- Have no sharp or protruding corners, edges or objects liable to cause injury or damage

Specification Notes

1. People nominated by the organisers, as scrutineers will check all soapbox carts for safety and reliability before being permitted to race. The scrutineer's decision is final.

2. The specification may be changed at short notice by the organisers in the interest of maintaining safety at the event.
